NOTE:--The above list we propose to carry on hand at all times in New York. Other designs may be on hand at times in lesser quantities. All designs shown in our catalogue No.250. and which are not carried in stock at New York can be shipped promptly from our Mill.

A large number of the above designs have been equipped with a new, and improved bead joint and in order to distinguish these from the old, we have added 4,000 to the design number, thus; No.211 with the new bead is No.4211. etc.etc.

Introduction.

IN this catalog we show the largest line of Steel Ceilings and walls in the world. To our older and better known patterns we have added many new styles of our own design and have recently acquired the entire line of Ceilings and walls formerly manufactured by the Laughlin Nail Company. ¶ We give the purchaser not only the largest, but the most artistic variety of designs from which to choose. : : : : : : :

WORKING PLANS.

SHOWING the arrangement of material shipped, are furnished in all cases where diagrams of the rooms to be ceiled are given us, and detailed drawings showing the method of applying are made. If a diagram of the room to be ceiled is furnished, with the distances from point to point, and the size and shape of all offsets, openings and irregularities indicated, we will be able to make more intelligent estimates, and if desired submit, free of charge, a design for the approval of the customer.

In all cases inform us of the height of the room and the distance from the window and door casings to the ceiling, so that a cornice of suitable depth may be selected

More satisfactory results will be obtained if some choice of design is indicated when inquiry is made. However, if customer expresses no preference, we will prepare an artistic arrangement of plates suitable for the shape of the room and the purpose for which it is to be used.

When desired, we will furnish experienced men to erect the material, charging for their time, transportation and board.

INSTRUCTIONS FOR APPLYING.

FURRING FOR FLAT PLATES AND SHALLOW PANELS.

STRIKE chalk lines the length of the room at distances indicated on the blue print so that they coincide with the center lines of the nailing beads on the plates. On these lines, nail ⅞ x ⅞ inch furring strips. Between these strips and across the room, nail "headers" or cross strips at distances from center to center equal to the distances between centers of the nailing beads of the plates as indicated on the blue print. Nail strips in angle of ceiling and wall and at a distance from the wall equal to the projection of the cornice to receive the cornice brackets. Bring the strips to a uniform depth by driving wedges between the strips and the old ceiling or joists, otherwise the ceiling will present an uneven appearance when completed.

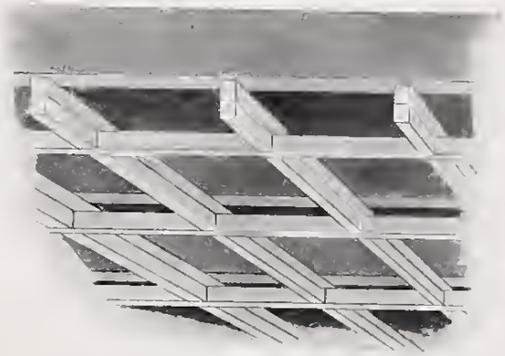
Flat plates may be applied to sheathing, in which case no furring strips will be required, but the sheathing should be level.

SINGLE FURRING.

FURRING FOR PANELS DEEPER THAN ⅞ INCH.

Nail furring strips the length of the room, as for flat plates, carefully leveling them with wedges. Then nail other strips at right angles on top of these, at distances from center to center equal to the distances between centers of the nailing beads of the panels, as shown on the blue print. Nail "headers" or cross strips at right angles to the last strips and on top of the first strips applied. This will bring all strips to the same level. To bring the cornice to the level of the ceiling nail one strip on top of another in the angle between the ceiling and the wall and at distance from the wall equal to the projection of the cornice.

APPLYING THE CEILING.



DOUBLE OR CROSS FURRING.

The Field sbould be applied first, then the Cornice and finally the Mold, Border or Filler as the case may be.

Beginning at one corner apply the ceiling plates across and along the room, keeping the lapping edges running from the light. Each piece should be carefully lapped so the beads will be straight and true and the joints not noticeable. The plates should be nailed at about 6 inch intervals with one inch wire nails with small heads. Use a sharp punch for making nail holes where there are more than two thicknesses of metal. The filler plate is cut to the proper width and lapped under the member on the side away from the cornice.

Close or "swedge" with a small dull tool any joints which may not have lapped tightly owing to the lapping beads having been bent or flattened in applying.

The list prices in this catalogue are for the plates, moldings, etc., given one coat of white paint on both sides before shipping and include brackets and nails for applying. If strips are required, we will furnish ⅞ x ⅞ inch furring at 25 cents per 100 lineal feet, or 1 x 1¼ inch furring at 30 cents.

STRIPS WILL NOT BE SHIPPED UNLESS ORDERED.

TERMS.

THIRTY DAYS net cash, or two per cent. discount from net amount of invoice for cash if paid within ten days from date of invoice. No discount allowed after ten days.

Bills not paid at maturity are subject to sight draft with exchange and cost of collection without further notice.

Remittances should be made in New York, Chicago or St. Louis Exchange.

Orders from patrons not favorably rated, and not sending references, will be shipped to our order, and draft, with bill of lading attached, will be sent through the bank for collection.

Delays will be avoided if references are furnished when inquiry is made.

Claims for errors should be made upon receipt of goods. All shipments should be checked upon arrival and errors reported immediately.

If goods are shipped according to order they should not be returned without our consent. If damaged in returning, credit will not be allowed to a greater amount than their value.

An invoice and bill of lading should be forwarded when goods are returned.
